Keivan Mojmali
Full Stack Web Developer

TECHNICAL SKILLS

STRONG: JavaScript (ES5/ES6), React.js, HTML5, CSS3, Bootstrap 3/4, Flexbox, Data Integrations (AJAX), RESTful APIs
EXPERIENCED: Node.js, Express.js, PostgreSQL, Shopify, Adobe Illustrator, Algorithms, WordPress
TOOLS: Git, GitHub, VS Code, Chrome DevTools, Figma, JSON, npm, Babel, Webpack, Db Designer
DESIGN PRINCIPLES: Modular Programming, Functional Programming, OOP, Mobile-First, Responsiveness, Accessibility

APPLICATIONS DEVELOPED

Point of Sale Application GitHub | Live - Browse inventory, add to cart, collect payment, see open orders and edit inventory
- Designed a **PostgreSQL**, relational database using **DB Designer** for current needs and possible features to be added in future
- Constructed **RESTful APIs** in **Node.js** using **Express.js** endpoints that validate parameter inputs, handle errors, and deliver inventory, shopping cart and order history
- Coded Front-end functionality using **OOP paradigm** and created with **React.js, JavaScript, Bootstrap and JSX** to allow multiple users to simultaneously use application for different goals

Beer Profile GitHub | Live - Users can explore craft beers, store beers to favorites, have a night planned for them with a random beer and a 3 course meal pairing or a randomly chosen beer flight using "Punk API"
- Designed a fully responsive wireframe in **Figma** with an intuitive UX experience
- Implemented design using **HTML5,CSS3**, **Bootstrap** and **Flexbox** to ensure uniformity across all platforms
- Constructed using **functional programming**, **JavaScript** and **AJAX** calls to pull data from **API**
- Stored all feature data in LocalStorage upon sign-up to ensure seamless transition between features and no loading time
